

Digital
Voice Recorder

Note ideas down digitally

Whether you are on your way, at home or at work, wherever you have brilliant ideas – with the Olympus Digital Voice Recorders thoughts, ideas and statements are captured within a second and without pen and paper.

Olympus offers a wide range of different digital Voice Recorders that take the users' individual wishes, situations of use and demands into account. They feature

- DSS (Digital Speech Standard) file format – For excellent sound quality at a high compression rate.
- Problem-free data transfer to PC and Mac – For smooth workflow.
- Simple editing – For comfortable handling.

Mixing business with pleasure

All Olympus Digital Voice Recorders of the DM range offer you 2 in 1: Digital Voice Recorder and high quality Music Player with built-in loudspeaker.

The Olympus DM-20 and DM-10 are perfect for recording any notes between times. Due to its remote control with integrated microphone and an optional attachable stereo-microphone stereo recording is possible, too. For relaxation after a strenuous day or between meetings, the integrated Music Player is just the job!

Attachable Stereo Microphone ME 50S

DM-20 and DM-10 are supplied with remote control with built-in microphone, docking station, and USB cable, DM-series utility software, stereo earphones, case, carrier strap and batteries.

NEW

Twice the performance

The DS-2000 is supplied with a 16 MB SmartMedia Card, USB cable, DSS Player software, PC connection cable for sound card (needed for voice recognition software) and batteries.

DS-2000

Flexible within the system

All compact and PC compatible Voice Recorders are perfect for mobile use and can help to optimize the daily workflow in office.

- USB cable or optional SmartMedia memory card adapter – For problem-free data transfer to PC.
- DSS Player Software – For convenient archiving, editing, writing and sending of e-mails.

Unlimited recording capacity with SmartMedia

Voice Recorder Memory Size	Playback Times		Music Player MP3/WMA	
	SP mode	LP mode	at 128 kbps	at 64 kbps
16 MB	2 hr. 35 min	5 hr. 30 min	15 min	30 min
32 MB	5 hr. 10 min	11 hr. 10 min	30 min	60 min
64 MB	10 hr. 25 min	22 hr. 20 min	60 min	120 min
128 MB	20 hr. 50 min	44 hr. 40 min	120 min	240 min

Data is recorded digitally in the high-compression, high-quality DSS format. By utilising the removable SmartMedia cards* to save files there is effectively no limit to recording times.

* also for use in Olympus digital cameras

Data transfer via docking station

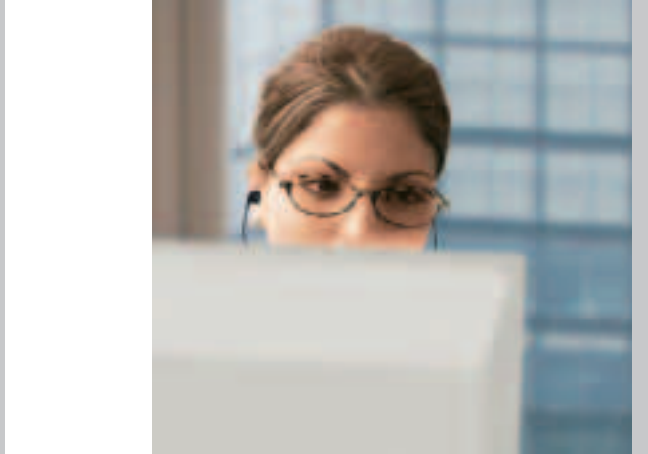

The DS-330 comes with a USB docking station for the fast up/download of voice files to the PC and Mac.

- Saves up to 330 minutes of dictation on its integrated 16 MB memory.
- Functions insert, erase, erase protection and entitle – For operating concept with convenience.
- 5 folders up to 199 files each – For easy file management.
- Noise cancellation to reduce unwanted background noise.

The DS-330 is supplied with docking station and USB cable, DSS Player software, PC connection cable for sound card (needed for voice recognition software), batteries and case.

DS-330

The tool for efficient workflow

The transcription Kit AS-2000 completes the Olympus digital voice recorder programme and ensures problem-free workflow from dictation to organising the audio files in the secretary's office.

- With typist's headset and footswitch – The secretary can control playback and working in as easy and comfortable as usually.
- The software DSS Player Transcription Module facilitates transcription process.
- Problem-free processing of downloaded or data received by e-mail. Marking data according to priority and work and including overview of all files status at any time – For simple and efficient workflow.
